

## PUBLIC NOTICE

Dominion intends to apply for a Virginia Water Protection (VWP) permit for withdrawal of water from Lake Anna (pursuant to 9 VAC 25-210-75) to support operation of a potential new generating unit (Unit 3) at the North Anna Power Station. If the company decides to build the new unit, the water will be withdrawn from an intake structure to be constructed within the property boundary of the existing North Anna Power Station, which is located at 1022 Haley Drive in Louisa County, Virginia.

Public informational meetings about the VWP water withdrawal permit for the potential Unit 3 project will be held on the following dates and times:

August 24 — Informational meeting, 4–5 p.m.  
Public comment period, 5–6 p.m.

August 26 — Informational meeting, 6–7 p.m.  
Public comment period, 7–8 p.m.

The meetings will be held at the following location:

Louisa County High School Auditorium  
757 Davis Highway  
Mineral, Virginia 23117

Information about other environmental permits associated with the potential Unit 3 project will be provided during the informational meetings. The format and content of the two meetings will be identical.

Comments related to VWP Water Withdrawal Permitting issues may be made during the public comment period. Written comments on these issues will also be accepted for a period of 15 days following the meetings. All comments will be considered during the subsequent regulatory process.

To obtain additional information about the public meetings contact:
